[PHOTO OF A WORKER AT A DESK]

[Text on Screen – Eligibility and benefits, Referrals, Prior authorizations]

Check eligibility and benefits, submit and check status on referrals and prior authorizations,

[PHOTO OF TWO HEALT CARE WORKERS LOOKING AT A COMPUTER]

[Text on Screen – Submit reconsiderations and appeals, Get copies of letters]

submit reconsideration and appeals, get copies of letters, and much more.

[PHOTO OF A WORKER AT A DESK]

[Text on Screen – Our digital solutions make it easier]

Whichever task you need to complete, our digital solutions help make it easier.

[Text on Screen – UnitedHealthcare Provider Portal]

The UnitedHealthcare Provider Portal is a great option for organizations that process a smaller number of transactions.

[Text on Screen – Manage claims and check eligibility]

Our free portal lets you manage claims and check eligibility and benefits 24/7.

[Text on Screen – TrackIt]

It also features our innovative TrackIt tool, which tells you what tasks need attention.

[Text on Screen – Your personal assistant]

TrackIt serves as your personal assistant, creating a helpful to do list every day.

[Text on Screen – Electronic Data Interchange]

For organizations that process a higher number of transactions, there is Electronic Data Interchange, or EDI,

[Text on Screen – Industry HIPAA X12 transactions]

which uses industry HIPAA X12 transactions.

[Text on Screen – EDI]

EDI uses a clearinghouse to link information between payers and providers quickly and securely.

[Text on Screen – Application Programming Interface]

A UnitedHealthcare Application Programming Interface, or API, provides a free way of gathering comprehensive and detailed information. With technical programming,

[GRAPHIC REPRESENTING API DISTRIBUTING DATA]

[Text on Screen – Distribute data, API]

API can help you securely distribute data to any application,

[Text on Screen – Aggregate data]

aggregate data from multiple sources,

[Text on Screen – Automate tasks]

automate manual tasks,

[Text on Screen – Minimize interruptions]

minimize interruptions to workflow,

[Text on Screen – Decrease phone calls]

and decrease phone calls.

[Text on Screen – Reduce costs]

A UnitedHealthcare API can help reduce costs,

[Text on Screen – Improve efficiency]

improve efficiency,

[Text on Screen – Optimize cashflow]

and optimize cash flow.
